P4000 4-in-1 Flip

Type C Adaptor tucked inside, and a USB Port for additional charging capabilities.

Industry:
Oil

Objective:
Looking specifically for a USB Drive/Power Bank hybrid product for an overseas oil conference with a quick in-hands date.

Solution:
Exact request proved difficult to find, so we suggested kitting a USB drive with a higher-end power bank together so both functions would be provided in a nice layout that would be easy to hand out. They loved the P4000 with it's universal adapters and generous imprint area.
